Forecast for Thursday 13 Aug 2020

Weather: Some clear spells across the far south, otherwise a mostly cloudy night with perhaps a little drizzle on northern hills. Then a mainly dry but rather cloudy day, although it will become brighter with the best of any sunnier spells developing across the south and west of the area.

Chance of cloud free mountain/hill tops above 800m: Little chance at first, and more generally across northern and eastern hills, with periods or persistent cloud above about 300 to 450m. However chances across the south and west improving to 90% by early afternoon with cloud more occasional above 900m.

Visibility: Rather hazy under cloud and perhaps just a few kilometres in any drizzle becoming very good in the southwest by early afternoon.

Met Office Aberdeen Meteorologist's View
Temperatures in the southwest my reach 22 or 23 Celsius by mid-afternoon.

Forecast for Friday 14 Aug 2020
Weather: Cloud increases again through the early hours with perhaps a little drizzle on northern and eastern hills. A mostly cloudy start to the day but cloud, especially across southern and western parts, lifting and breaking to leave some good spells of afternoon sunshine.

Maximum wind: Variable, mainly easterly or northeasterly, 10mph or less

Chance of cloud free mountain/hill tops above 800m: Little chance at first with periods or persistent cloud above about 300m. However chances, especially across southern and western parts, improving to 90% by early afternoon with cloud more occasional above 900m.

Visibility: Rather hazy under cloud and perhaps just a few kilometres in any drizzle becoming very good, especially in the south and west, by early afternoon.

Temperature: **Glens:** Around plus 10 Celsius at dawn rising to plus 20 or 21 Celsius by day
At 800m: Around plus 11 Celsius
Freezing level: Above the summits
